

MINE OPERATORS ASSOCIATION OF TONOPAH MAKE VALUABLE PRESENT TO THE MINERS' UNION HOSPITAL

The Tonopah Mine Operators' association has presented to the Tonopah Miners' Union hospital one of the finest and most complete sterilizing outfits on the coast. The outfit has been installed in the operating room and has been declared by local surgeons and physicians that for cost and efficiency it is equal to any such outfit now in use on the Pacific coast.

The apparatus consists of an instrument sterilizer, which is opened and closed by foot power; two 10-gallon water sterilizers, one for hot and the other for cold water, gauged to 20 pounds' pressure, with water filters, thermometers and safety valves connected; one dressing sterilizer gauged to 30 pounds' pressure and capable of developing 274 degrees. This is similarly equipped as the water sterilizers. The entire apparatus is made of copper and is nickel plated without and tin lined within.

This addition to the hospital means that the institution now has facilities for safe surgery equal to the hospitals of San Francisco and Los Angeles. The generous gift of the Mine Operators' association also means the saving of the limbs and lives of patients, as the danger of infection and blood poisoning, which has always been the terror of surgeons in the past, will, in a large degree, be eliminated. It means further that the Miners' hospital of Tonopah is today one of the best equipped institutions of its kind in the state of Nevada.

Last June the Mine Operators' association took up the matter of purchasing the sterilizing outfit, after consulting with local physicians. The apparatus was sadly needed and after making a thorough investigation of the subject the association appointed W. W. Charles of the Tonopah Mining company and W. J. Douglas of the Midway company as a committee to act. Later Dr. P. D. McLeod, while in San Francisco, was commissioned to select the apparatus which has just arrived and is now ready for service.

This act of the Mine Operators' association will undoubtedly enhance the already cordial relations that exist with the miners of the district.
